Work Experience

Junior Software Engineer Intern

Epam Systems-Coimbatore,TamilNadu

Internship

January 2026 to June 2026

EPAM Systems - Software Engineering Intern Experience

Worked on software quality assurance and test automation activities, developing and maintaining automated regression tests for web applications and REST APIs. Built reusable test automation components using Java, Selenium WebDriver, REST Assured, TestNG, Cucumber, and the Page Object Model.

Integrated automated regression tests into Jenkins-based CI/CD pipelines to support continuous testing and early defect detection during application changes. Used Maven for dependency management and build execution and Git for version control and collaboration.

Contributed to improving test reliability, regression coverage, and automation workflows by designing maintainable test structures and supporting automated execution within the software delivery lifecycle.

Technologies: Java, Selenium WebDriver, REST Assured, TestNG, Cucumber, Maven, Jenkins, Git, CI/CD, Regression Testing, API Testing, Page Object Model

Education

Computer Science and Engineering (Bachelor's degree)

Nandha Engineering College-Nagercoil, Tamil Nadu

November 2022 to May 2026

1. File Integrity Monitoring & Alerting System Built a system to detect unauthorized file changes using SHA-256 hashing and scheduled integrity checks. Added monitoring dashboards, containerization, and CI/CD automation. Tech: Java 17, Spring Boot, Maven, SHA-256, Actuator, Micrometer, Prometheus, Grafana, Docker, Jenkins, Git GitHub:<https://github.com/SuryaBramananthan24/file-integrity-monitor>
2. Smart Urban Transportation System Built a transportation system with AI face verification, IP geolocation, route/fare calculation, and ticket generation. Used Python/Flask for AI services and Spring Boot for invoice and email delivery. Tech: Python, Flask, OpenCV, InsightFace, HERE Maps API, JWT, HTML, CSS, Java, Spring Boot, Microservices, Spring Email GitHub:<https://github.com/SuryaBramananthan24/Smart-Urban-Transportation-System-using-Geolocation-Intelligence-and-AI-based-Face-verification>
3. FairFare - Rapido Clone Developed an auto transportation and fare calculation application with location and route functionality. Tech: Node.js, Express.js, MongoDB, JavaScript, HTML, CSS, HERE Maps API GitHub:<https://github.com/SuryaBramananthan24/FairFare-Auto-Fare-Calculator>
4. Invoice Generation & Email Dispatch Platform Built REST APIs to process invoices, calculate totals, generate PDF invoices, and send them by email. Tech: Java 17, Spring Boot, Spring Web, Spring Mail, OpenPDF, Maven, Lombok, Gmail SMTP GitHub:<https://github.com/SuryaBramananthan24/Invoice-Generation-and-Email-Dispatch-Platform>

5. Test Automation Framework Built a reusable UI and API automation framework using POM and Cucumber, with Jenkins for automated execution. Tech: Java, Selenium, REST Assured, TestNG, Maven, Git, Jenkins, Cucumber, POM
6. CI/CD Regression Test Automation Framework Developed reusable regression test suites integrated into CI/CD workflows to validate application changes. Tech: Java, Regression Testing, Test Automation, CI/CD, Jenkins, Git
7. DevOps CI/CD Regression Testing Pipeline Built a CI/CD pipeline to automatically execute regression tests and improve release reliability. Tech: Jenkins, CI/CD, DevOps, Automated Regression Testing, Git
8. AWS EC2 Infrastructure Provisioning using Terraform Automated AWS EC2 infrastructure provisioning using reusable Infrastructure as Code. Tech: AWS EC2, Terraform, IaC, Linux
9. AWS Bastion Host Architecture Designed secure AWS infrastructure using a bastion host for controlled SSH access to private instances. Tech: AWS EC2, VPC, Security Groups, Bastion Host, SSH, Linux
10. Student-Professor Appointment Booking System Developed an application enabling students to schedule and manage professor appointments. GitHub:https://github.com/SuryaBramananthan24/Schedule_Appointments
11. Dual-Language Translator - Tamil & French Built an application generating Tamil and French translations in parallel. Tech: Python, LangChain, RunnableParallel, Chat Models, OpenAI API
GitHub:<https://github.com/SuryaBramananthan24/Dual-Language-Translator-Tamil-French->
12. QR Code Generator Developed a web application that generates QR codes from user input. Tech: Python, Flask, HTML, qrcode
GitHub:<https://github.com/SuryaBramananthan24/QR-Code-Generator>

Skills / IT Skills

- Git
- HTML
- MySQL
- Full-stack development
- Linux
- Agile
- Python
- SQL
- AWS Amplify
- CI/CD
- Jenkins
- REST
- ExpressJs
- AWS
- Prometheus
- SDLC
- Docker
- Amazon S3
- Spring Boot
- Software development
- Databases
- Analysis skills
- APIs

- Grafana
- Communication skills
- Software troubleshooting
- Java
- Flask
- SHA-256
- JavaScript
- Amazon EC2
